Professional Summary

Computer Science student specializing in Cloud Security, DevSecOps, and Automated Compliance. Hands-on architecting production AWS environments with Terraform, engineering event-driven remediation, and enforcing CI/CD security gating with Trivy, SonarQube, and Checkov. Active Saudi Iqama; seeking a Cloud Security / DevSecOps role (immediate transfer, Feb 2027 intake, or graduate entry).

Education

Universiti Teknologi Malaysia — Johor, Malaysia

B.Sc. in Computer Science (Networking and Security) — *Oct 2023 - Oct 2027*

- **Academic Standing:** CGPA 3.43/4.00 (Dean's List). **Honors:** 3rd Place, ASEAN Cyber Race 2025 CTF Finals (15 teams from 8 countries), Cisco Networking Academy (Nov 2025); AWS Agentic AI Hackathon, LEAP 2026 Riyadh (Sep 2026)

Experience

Al-Ameen Medical Complex — Riyadh, Saudi Arabia

IT Systems & Infrastructure Intern — *Sep 2026 - Present*

- Administer enterprise network infrastructure, VLAN segmentation, and endpoint configurations across clinical departments, maintaining high availability and secure workstation connectivity.
- Manage Windows and Linux systems, Active Directory user access policies, and hardware diagnostics, resolving network and infrastructure incidents under enterprise SLAs.

Technical Skills

Cloud & Infrastructure: AWS (VPC, EC2, S3, IAM, EventBridge, Lambda, NAT Gateway), Terraform (IaC), Serverless, Boto3, CloudWatch, CloudTrail

DevOps & CI/CD: GitHub Actions, Docker, Kubernetes, Ansible, Linux (RHEL/Ubuntu), Bash, Python, Git, YAML

Cloud Security & Compliance: IAM Policy Design, Least Privilege, Trivy (Container Scanning), SonarQube (SAST/SCA), Checkov (IaC Security), CIS Benchmarks

Networking & Systems: TCP/IP, OSPF, VLANs (802.1Q), IPSec VPN, Cisco IOS, Access Control Lists (ACLs), Wireshark, SQL

Certifications

Held: Cisco DevNet Associate (Aug 2026); Cisco CCNA: ITN, SRWE, ENSA (Mar 2026); Cisco CCST: Cybersecurity (Jan 2026); TryHackMe AI Security, DevSecOps, & Security Engineer Paths (Oct 2026)

In progress: AWS Solutions Architect Associate (SAA-C03); Red Hat Certified System Administrator (RHCSA) (both expected Q4 2026)

Projects

Automated Cloud Compliance & Remediation Engine | GitHub | *AWS, Lambda, Python* — Apr 2026 - Sep 2026

- Engineered a serverless remediation engine on EventBridge and Lambda that detects and fixes **public S3 ACLs, weak KMS encryption, unencrypted EBS volumes, and open ports (22/3389)** on the triggering CloudTrail event, backed by **325 Python unit tests** and **25 offline Terraform tests**.
- Built a **read-only MCP server** exposing 6 inspection tools for natural-language posture and log audits, strictly enforcing read-only boundaries via **Python AST analysis** and a least-privilege IAM reader policy.

Aegis-2B: Sub-Second Safety Circuit Breaker for Cloud Ops | GitHub | *Python, AWS Bedrock, SLM* — Oct 2026

- Engineered a pre-HTTP safety circuit breaker for autonomous cloud agents using local Strands Decider 2B SLM paired with Amazon Bedrock cognitive planning.
- Intercepted mutating operations inside Botocore request lifecycles, cutting safety evaluation latency from **1,840ms to 114.5ms (16.1x faster)** with **100% token cost reduction**, verified across **6 pytest test suites**.

MindCraft: Three-Tier Web Infrastructure & Gated CI/CD | GitHub | *AWS, Docker, CI/CD* — Oct 2025

- Provisioned a self-managed multi-tier AWS environment via Terraform (**47 resources** across VPC, ALB, EC2, CloudWatch) with isolated subnets and least-privilege IAM roles, and engineered a GitHub Actions CI/CD pipeline enforcing shift-left **Trivy image scanning that blocks critical CVEs** prior to SSM deployment.
